

Abstract of the Invention

This invention is directed to a method for preventing or treating bipolar
 5 disorder comprising administering to a subject in need thereof a therapeutically
 effective amount of an enantiomer of Formula (I) or enantiomeric mixture
 wherein one enantiomer of Formula (I) predominates:

Formula (I)

wherein phenyl is substituted at X with one to five halogen atoms selected from
 the group consisting of fluorine, chlorine, bromine and iodine; and, R₁, R₂, R₃
 10 and R₄ are independently selected from the group consisting of hydrogen and
 C₁-C₄ alkyl; wherein C₁-C₄ alkyl is optionally substituted with phenyl (wherein
 phenyl is optionally substituted with substituents independently selected from
 the group consisting of halogen, C₁-C₄ alkyl, C₁-C₄ alkoxy, amino, nitro and
 cyano).
